CONTENTS VOLUME 83 JULY 1986

page 1 HYLDAHL, L. Control of cell proliferation in the human embryonic cornea: an autoradiographic analysis of the effect of growth factors on DNA synthesis in endothelial and stromal cells in organ culture and after explantation *in vitro*

23 GREBECKI, A. Two-directional pattern of movements on the cell surface of *Amoeba proteus*

37 BROERS, J. L. V., CARNEY, D. N., KLEIN ROT, M., SCHAART, G., LANE, E. B., VOOIJS, G. P. and RAMAEKERS, F. C. S. Intermediate filament proteins in classic and variant types of small cell lung carcinoma cell lines: a biochemical and immunochemical analysis using a panel of monoclonal and polyclonal antibodies

61 BENNETT, H. and CONDEELIS, J. A gradient in the density of intramembrane particles is formed during capping induced by concanavalin A

77 KENDALL, M. D. and WARLEY, A. Elemental content of mast cell granules measured by X-ray microanalysis of rat thymic tissue sections

89 KNOWLES, B. H. and ELLAR, D. J. Characterization and partial purification of a plasma membrane receptor for *Bacillus thuringiensis* var. *kurstaki* Lepidopteran-specific δ-endotoxin

103 LEE, C. M., CARPENTER, F., COAKER, T. and KEALEY, T. The primary culture of epithelia from the secretory coil and collecting duct of normal human and cystic fibrotic eccrine sweat glands

119 CASEY, K. A., MAUREY, K. M. and STORRIE, B. Characterization of early compartments in fluid phase pinocytosis: a cell fractionation study

135 HEATH, I. B., KAMINSKYJ, S. G. W. and BAUCHOP, T. Basal body loss during fungal zoospore encystment: evidence against centriole autonomy

141 SIMONS, H. L. and SEVERS, N. J. Plasmalemmal vesicles and the effects of sterol-binding agents in rabbit aortic endothelium

155 KOTH, J. and CLEFFMANN, G. Pattern of DNA increase in macronuclear anlagen of *Tetrahymena*

165 KAY, R. R., GADIAN, D. G. and WILLIAMS, S. R. Intracellular pH in *Dictyostelium*: a ^{31}P nuclear magnetic resonance study of its regulation and possible role in controlling cell differentiation

181 SAWYER, J. T. and AKESON, R. A. Differential redistribution of lectin receptor classes on clonal rat myotubes and myoblasts

197 ISHIURA, S., NONAKA, I. and SUGITA, H. Biochemical aspects of bupivacaine-induced acute muscle degradation

213 MITCHELL, E. L. D. and HILL, R. S. The occurrence of lampbrush chromosomes in early diplotene oocytes of *Xenopus laevis*

223 QUADER, H. Cellulose microfibril orientation in *Oocystis solitaria*: proof that microtubules control the alignment of the terminal complexes

235 FANTINI, J., ABADIE, B., TIRARD, A., REMY, L., RIPERT, J. P., EL BATTARI, A. and MARVALDI, J. Spontaneous and induced dome formation by two clonal cell populations derived from a human adenocarcinoma cell line HT29

251 WARNER, F. D. and MCILVAIN, J. H. Kinetic properties of microtubule-activated 13 S and 21 S dynein ATPases: evidence for allosteric behaviour associated with the inner row and outer row dynein arms

269 PRESTON, R. R. and NEWMAN, T. M. Rectilinear particle arrays in freeze-fracture replicas of the surface membrane of *Paramecium tetraurelia*

293 CHANDLER, D. E. and KAZILEK, C. J. Chemotactic peptide-induced exocytosis in neutrophils: granule fusion patterns depend on the source of messenger calcium

313 DUNN, G. A. and BROWN, A. F. Alignment of fibroblasts on grooved surfaces described by a simple geometric transformation

WILLIAMS, S. R. 165

INDEX OF SUBJECTS

Affinity chromatography
in purification of plasma membrane receptor for *B. thuringiensis* var. *kurstaki* δ-endotoxin: KNOWLES & ELLAR 89
Amoeba proteus
movements on cell surface, 2-dimensional pattern: GREBECKI 23

Bacillus thuringiensis* var. *kurstaki
δ-endotoxin, characterization of plasma membrane receptor: KNOWLES & ELLAR 89
Basal bodies
lost during fungal spore encystment: HEATH, KAMINSKYJ & BAUCHOP 135
Bupivacaine
-induced muscle degradation, biochemical aspects: ISHIURA, NONAKA & SUGITA 197

Calcium
as second messenger in granule fusion in exocytosis in neutrophils: CHANDLER & KAZILEK 293
Cathepsin B
increased activity in bupivacaine-injected rat muscle: ISHIURA, NONAKA & SUGITA 197
Cell differentiation
control in *Dictyostelium*, role of intracellular pH: KAY, GADIAN & WILLIAMS 165
Cell polarity
during capping of ConA by *Dictyostelium* amoebae: BENNETT & CONDEELIS 61
Cell proliferation
control, in human embryonic cornea: HYLDAHL 1
Cell shape
analysis by the method of moments: DUNN & BROWN 313
Cell surface
in locomotion in *Amoeba proteus*: GREBECKI 23
Cellulose
microfibril orientation in *Oocystis solitaria*: QUADAR 223
Centrioles
evidence against autonomy in fungal zoospore encystment: HEATH, KAMINSKYJ & BAUCHOP 135
Chemotactic peptides
induce exocytosis in neutrophils: CHANDLER & KAZILEK 293
Cholesterol
in aortic endothelial plasmalemma of rabbit: SIMONS & SEVERS 141
Cilia
of *Tetrahymena*, kinetic properties of microtubule-activated dynein ATPases: WARNER & McILVAIN 251
Contact guidance
in analysis of shape and alignment of fibroblasts on grooved surfaces: DUNN & BROWN 313
Cornea
human embryonic, control of cell proliferation: HYLDAHL 1
Culture
primary, of cystic fibrotic eccrine sweat gland epithelial cells: LEE, CARPENTER, COAKER & KEALEY 103
Cystic fibrosis
eccrine sweat glands, culture of epithelia: LEE, CARPENTER, COAKER & KEALEY 103
Cytokeratin
in small cell lung carcinoma cell lines: BROERS, CARNEY, KLEIN ROT, SCHAART, LANE, VOOIJS & RAMAEKERS 37
Cytoskeleton
role in polarization of cell shape in *Dictyostelium*: BENNETT & CONDEELIS 61

Dictyostelium discoideum
development of cell polarity during capping in amoebae: BENNETT & CONDEELIS 61
intracellular pH, regulation and role in differentiation: KAY, GADIAN & WILLIAMS 165
Differentiation
dome formation by two clonal lines of HT29 cells: FANTINI, ABADIE, TIRARD, REMY, RIPERT, EL BATTARI & MARVALDI 235
Diplotene
early, of *Xenopus* oocytes, lampbrush chromosomes: MITCHELL & HILL 213
DNA content
of *Tetrahymena* macronuclear anlagen: ROTH & CLEFFMANN 155
Domes
spontaneous and induced formation by two clonal lines of HT29 cells: FANTINI, ABADIE, TIRARD, REMY, RIPERT, EL BATTARI & MARVALDI 235

Dynein ATPases
13 S and 21 S, microtubule-activated, of *Tetrahymena*, kinetic properties: WARNER & McILVAIN 251

Elemental content
of mast cell granules in rat thymic tissue: KENDALL & WARLEY 77
Endosomes
characterization in fluid phase pinocytosis: CASEY, MAUREY & STORRIE 119
Endothelial vesicles
in rabbit aorta, effects of sterol-binding agents: SIMONS & SEVERS 141
γ-Endotoxin
of *Bacillus thuringiensis* var. *kurstaki*, plasma membrane receptor: KNOWLES & ELLAR 89
Epithelia
of secretory coil and collecting duct of human and cystic fibrotic eccrine sweat glands: LEE, CARPENTER, COAKER & KEALEY 103
Exocytosis
induced in neutrophils by chemotactic peptides: CHANDLER & KAZILEK 293

Fibroblasts
grown on grooved surfaces, analysis of shape and alignment by the method of moments: DUNN & BROWN 313
study of early compartments in fluid phase pinocytosis: CASEY, MAUREY & STORRIE 119
Filipin
in localization of sterols in rabbit aotic endothelium: SIMONS & SEVERS 141
Flagella
and basal bodies of *Neocallimastix* shed during zoospore encystment: HEATH, KAMINSKYJ & BAUCHOP 135
Freeze-fracture
of surface membrane of *Paramecium tetraurelia*, particle arrays: PRESTON & NEWMAN 269
Fungi
zoospore encystment, basal body loss: HEATH, KAMINSKYJ & BAUCHOP 135

Gel electrophoresis
in study of intermediate filament proteins of lung carcinoma cell lines: BROERS, CARNEY, KLEIN ROT, SCHAART, LANE, VOOIJS & RAMAEKERS 37
Grooved substrata
fibroblasts grown on, analysis of cell shape and alignment: DUNN & BROWN 313
Growth factors
effect on DNA synthesis in human embryonic cornea: HYLDAHL 1

Horseradish peroxidase
internalized by fluid phase pinocytosis, in study of pinosomes: CASEY, MAUREY & STORRIE 119
HT29 cells
spontaneous and induced dome formation: FANTINI, ABADIE, TIRARD, REMY, RIPERT, EL BATTARI & MARVALDI 235

Immunoblotting
in study of intermediate filament proteins in lung carcinoma cell lines: BROERS, CARNEY, KLEIN ROT, SCHAART, LANE, VOOIJS & RAMAEKERS 37
Immunocytochemistry
in study of intermediate filament proteins in lung carcinoma cell lines: BROERS, CARNEY, KLEIN ROT, SCHAART, LANE, VOOIJS & RAMAEKERS 37
Insecticide
δ-endotoxin, lepidopteran-specific, study of plasma membrane receptor: KNOWLES & ELLAR 89
Intracellular pH
in *Dictyostelium*, regulation and role in differentiation: KAY, GADIANE & WILLIAMS 165

Lampbrush chromosomes
occurrence in early diplotene oocytes of *Xenopus laevis*: MITCHELL & HILL 213
Lectin binding
receptor classes, differential redistribution on clonal rat myotubes and myoblasts: SAWYER & AKESON 181

Macronuclear anlagen
of *Tetrahymena*, pattern of DNA increase: ROTH & CLEFFMANN 155
Macrophages
source of increase in lysosomal enzymes in bupivacaine-injected rat muscle: ISHIURA, NANAKA & SUGITA 197
Mast cell granules
of rat thymic tissue, elemental content: KENDALL & WARLEY 77
Membrane flow
in locomotion of *Amoeba*: GREBECKI 23
Membrane fusion
in chemotactic-induced exocytosis in neutrophils: CHANDLER & KAZILEK 293
Microfibril orientation
of cellulose in *Oocystis solitaria*: QUADAR 223

Microtubules
control alignment of terminal complexes in cellulose deposition in *Oocystis*: QUADAR 223
Moments
method of, in analysis of shape and alignment of fibroblasts grown on grooved surfaces: DUNN & BROWN 313
Muscle
acute degradation induced by bupivacaine, biochemical aspects: ISHIURA, NONAKA & SUGITA 197
Myogenesis
in rat, relative mobilities of lectin receptors: SAWYER & AKESON 181

Neurofilaments
in small cell lung carcinoma cell lines: BROERS, CARNEY, KLEIN ROT, SCHAART, LANE, VOOIJS & RAMAEKERS 37

Oocytes
of *Xenopus laevis*, lampbrush chromosomes at early diplotene: MITCHELL & HILL 213
Organelle evolution
evidence against centriole autonomy in *Neocallimastix*: HEATH, KAMINSKYJ & BAUCHOP 135

Paramecium tetraurelia
freeze-fracture of surface membrane: PRESTON & NEWMAN 269
Particle arrays
in freeze-fracture of *Paramecium tetraurelia* surface membrane: PRESTON & NEWMAN 269
Pinocytosis
fluid-phase, early compartments: CASEY, MAUREY & STORRIE 119
Plasma membrane
alignment of structures by cortical microtubules in *Oocystis*: QUADAR 223
Plasmalemmal vesicles
effects of sterol-binding agents in rabbit aortic endothelium: SIMONS & SEVERS 141
^{31}P n.m.r.
study of intracellular pH in *Dictyostelium*: KAY, GADIAN & WILLIAMS 165
Positive cooperativity
of 13 S and 21 S dynein ATPases of *Tetrahymena* cilia: WARNER & McILVAIN 251
Protease
increased activity in rat muscle after bupivacaine injection: ISHIURA, NONAKA & SUGITA 197

Receptor mobility
during myogenesis in rat: SAWYER & AKESON 181

Saturation kinetics
of 13 S and 21 S dynein ATPases of *Tetrahymena*: WARNER & McILVAIN 251
Sterols
-binding agents, effects in rabbit aortic endothelium: SIMONS & SEVERS 141
Sweat glands
culture of epithelia of normal and cystic fibrotic eccrine sweat glands: LEE, CARPENTER, COAKER & KEALEY 103

Tetrahymena
pattern of DNA increase in macronuclear anlagen: ROTH & CLEFFMANN 155
Thymus
tissue of rat, elemental content of mast cell granules: KENDALL & WARLEY 77
Tomatin
treatment of rabbit aortic endothelium compared with filipin treatment in sterol detection study: SIMONS & SEVERS 141
Toxin receptor
in plasma membrane for *Bacillus thuringiensis* var. *kurstaki* lepidopteran-specific δ-endotoxin: KNOWLES & ELLAR 89
Trypsin
as dome-inducer in HT29 cell lines: FANTINI, ABADIE, TIRARD, REMY, RIPERT, EL BATTARI & MARVALDI 235

Ultra-rapid freezing
of *Paramecium tetraurelia* surface membrane: PRESTON & NEWMAN 269

Vimentin
in small cell lung carcinoma cell lines: BROERS, CARNEY, KLEIN ROT, SCHAART, LANE, VOOIJS & RAMAEKERS 37

Xenopus laevis
early diplotene oocytes, lampbrush chromosomes: MITCHELL & HILL 213
X-ray microanalysis
of rat thymic tissue, elemental content of mast cell granules: KENDALL & WARLEY 77

Zoospores
encystment in fungi, basal body loss: HEATH, KAMINSKYJ & BAUCHOP 135
